Question 1. (HOTSPOT)

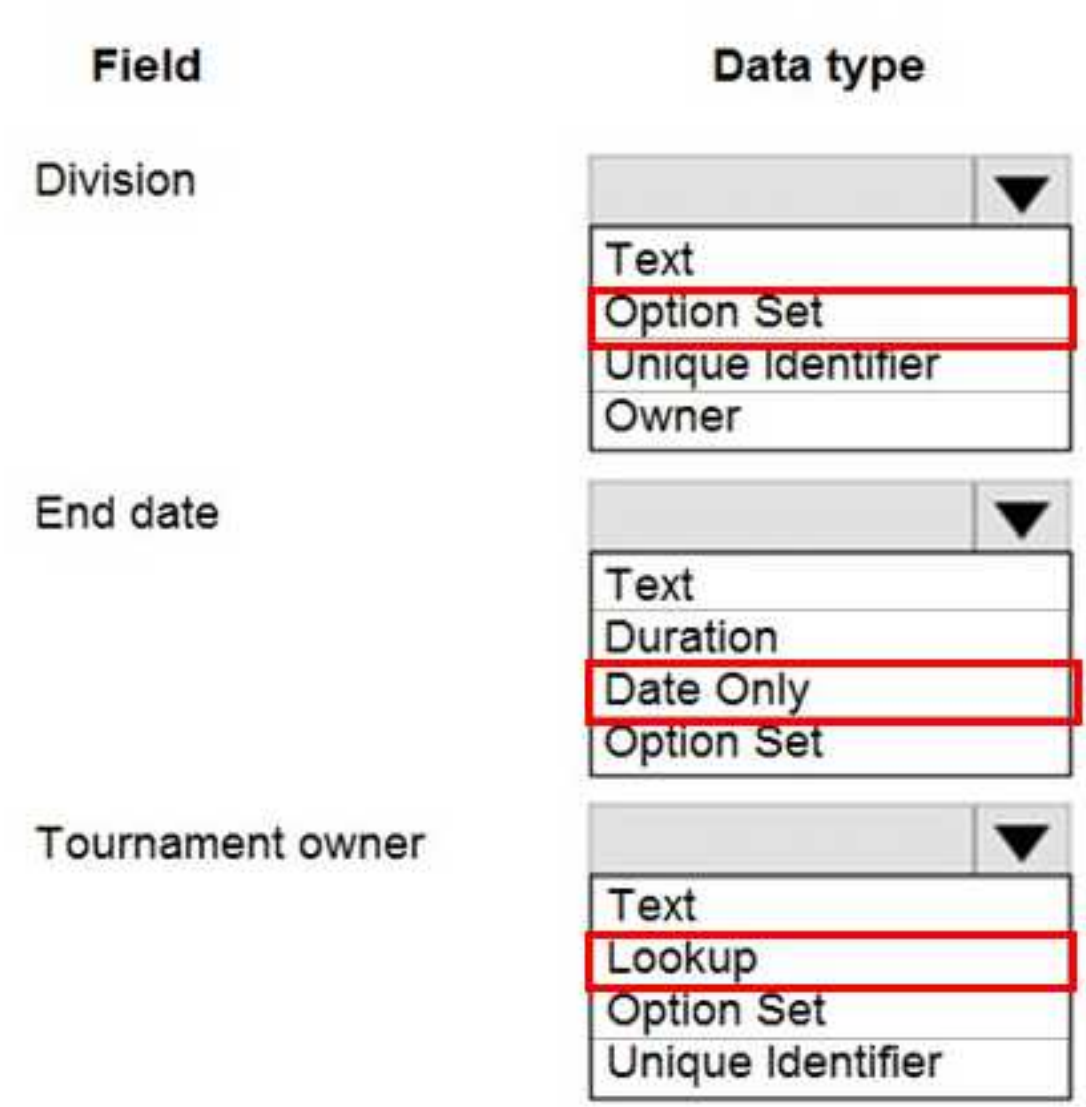
You need to select data types for required fields.

Which data types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Field	Data type
Division	Text Option Set Unique Identifier Owner
End date	Text Duration Date Only Option Set
Tournament owner	Text Lookup Option Set Unique Identifier

Answer:



Explanation:

https://docs.microsoft.com/en-us/powerapps/maker/data-platform/types-of-fields

Question 2. (Multi Select)

You need to configure the system to support automation for referrals.

What are two possible ways to achieve the goal? Each correct selection presents a complete solution.

NOTE: Each correct selection is worth one point.

A: Azure Function that uses the Discovery service

B: workflow extension

C: Azure Function that uses a listener

D: Power Automate flow

Answer: C, D

Explanation:

https://docs.microsoft.com/en-us/dotnet/api/system.io.filesystemwatcher

https://docs.microsoft.com/en-us/power-automate/

Question 3. (Single Select)

You need to determine the primary cause of the issue reported by interns when they use the app.

What is the primary cause?

A: Interns have the System Customizer security role but need the Environment Maker security role.
B: Interns have the Common Data Service User security role but need the Environment Maker security role.
C: Interns have the Environment Maker security role but need the Common Data Service User security role.
D: Interns have the Environment Maker security role but need the System Customizer security role.
E: Interns have the Environment Maker security role but need the Delegate security role.

Answer: D

Explanation:

Scenario: Interns can create apps but cannot interact with their own data.
Environment Maker role: Can create new resources associated with an environment, including apps, connections, custom APIs, gateways, and flows using Microsoft Power Automate. However, this role doesn't have any privileges to access data within an environment.
System Customizer role: full permission to customize the environment. However, users with this role can only view records for environment entities that they create.

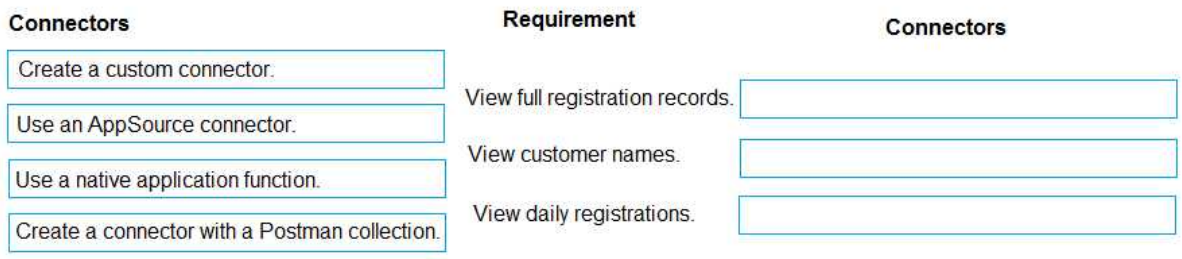
Question 4. (DRAGDROP)

You need to select connectors for the app.

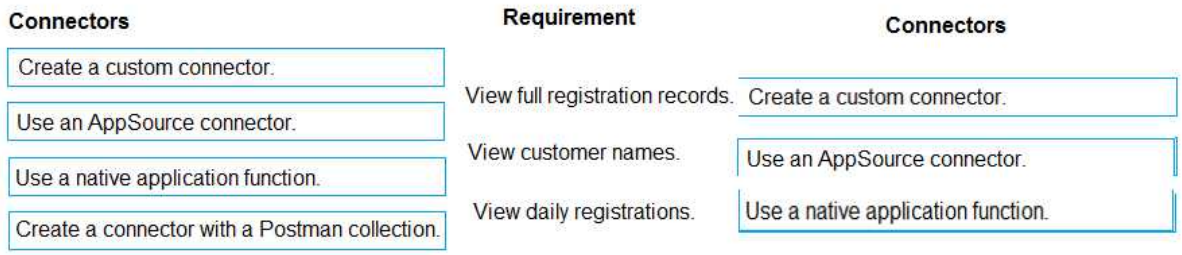
Which types of connectors should you use? To answer, drag the appropriate connectors to the correct requirements. Each connector may be used once, more than once, or not at all. You may need to drag the

split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.



Answer:



Explanation:

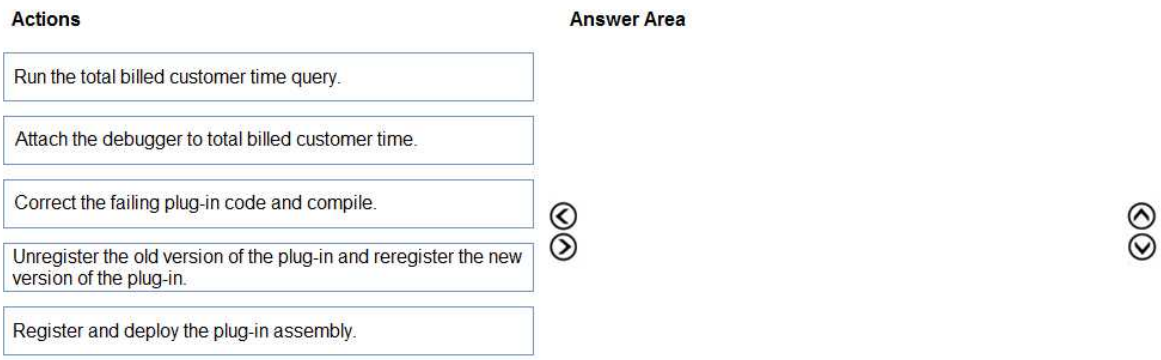
https://docs.microsoft.com/en-us/connectors/custom-connectors/

https://docs.microsoft.com/en-us/dynamics365/customer-insights/audience-insights/export-power-apps

Question 5. (ORDERLIST)

You need to resolve the performance issue with the Total Billed customer plug-in.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.



Actions
Answer Area
Run the total billed customer time query.
Attach the debugger to total billed customer time.
Correct the failing plug-in code and compile.
Unregister the old version of the plug-in and reregister the new version of the plug-in.
Register and deploy the plug-in assembly.

A: Run the total billed customer time query.

B: Attach the debugger to total billed customer time.

C: Correct the failing plug-in code and compile.

D: Unregister the old version of the plug-in and register the new version of the plug-in.

E: Register and deploy the plug-in assembly.

Answer: B, A, C, E, D

Explanation:

https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/developer/register-deploy-plugins
